FOREWORD

This publication sets forth all of the requests made by the Hawaii State Legislature during the Regular Session of 2022 to agencies and officials of the federal, state and county governments and of quasi-public and private agencies. These requests are contained in acts enacted by the Legislature or bills passed, but some of which have yet to be approved by the Governor. These acts or bills include specific requests for submission of information back to the Legislature, excluding annual and other reports requested on an indefinite basis. (New, first-year annual reports are included in this publication). These requests are also contained in resolutions adopted by the Senate or House of Representatives or by both bodies of the Legislature. Dates by which reports and other responses are expected are indicated when specifically set by the Legislature. The names of the agencies involved in the conduct of a study or the execution of a request are underscored.

For the reader's convenience these legislative requests are also grouped together by agencies (see agency index); as well as by subject matter (see subject index).

Standard abbreviations used in the text are:

SB	-	Senate Bill
SD	-	Senate Draft
SR	-	Senate Resolution
SSCR	-	Senate Standing Committee Report
HB	-	House Bill
HD	-	House Draft
HR	-	House Resolution
HSCR	-	House Standing Committee Report
CD	-	Conference Draft

Requests the Hawaii State Energy Office to convene a working group to examine issues and barriers to the installation of electric vehicle charging systems in multi-unit dwellings and make recommendations regarding changes to statutes and rules or other guidance to help clarify and facilitate the installation of electric vehicle charging systems in multi-unit dwellings.

Requests the working group to examine:

- (1) Barriers to the installation of electric vehicle charging systems at multi-unit dwellings and the underlying issues that give rise to these barriers;
- (2) Whether changes to state statutes and rules or other guidance could provide solutions and unburden associations tasked with advising owners on technical matters on which they lack expertise;

- (3) Whether guidelines should be established for reasonable technical solutions instead of leaving associations to unilaterally determine installation practices pursuant to section 196-7.5, Hawaii Revised Statutes, and, if so, where those guidelines should be identified in statute;
- (4) A range of technical solutions, including cost recovery and capacity management;
- (5) Management recommendations for multiple owners who wish to install a shared-use charging system as a shared amenity; and
- (6) Other issues deemed relevant and necessary.

Resolves that the members of the working group include the following:

- (1) A representative from the Hawaii State Energy Office, who is requested to officially convene the working group and serve as its chairperson;
- (2) The Director of Commerce and Consumer Affairs, or the Director's designee;
- (3) A representative of the Public Benefits Fee Administrator;
- (4) A representative from the City and County of Honolulu's Department of Planning and Permitting;

ENERGY EQUITY AND JUSTICE, LOW- AND MODERATE-INCOME CUSTOMERS, ENERGY BURDEN. Requests the Public Utilities Commission to consider efforts to mitigate high energy burdens for low- and moderate-income customers and input by the Consumer Advocate and investigate how to integrate considerations of energy equity and justice across its work.

Requests the Public Utilities Commission to examine:

- (1) Low- and moderate-income rate discounts, bill credits, and direct payments and whether these would be appropriate in the State;
- (2) Expanded availability of utility bill assistance programs and whether adequate payment plan arrangements are available to low- and moderate-income customers who are facing economic challenges, such as loss of employment;

- (3) Measures to protect low- and moderate-income households, senior citizens, and households with infants from service disconnections, including reporting requirements for all utilities on the number of customers annually disconnected due to non-payment;
- (4) The advantages and disadvantages of rate design, program offerings, and the requirements of community benefits agreements to address energy burden, energy insecurity, and environmental and energy justice concerns related to energy projects and programs; and
- (5) Other customer-centric solutions to lessen the energy burden on low- and moderate-income customers and determine appropriate benefits above and beyond those accrued to the overall electric grid for communities that serve as geographic hosts to utility scale energy projects.

Requests the Public Utilities Commission to establish the necessary proceeding or proceedings to conduct this examination; provided that the proceedings are not duplicative, but rather focus on the need for integration of energy equity and justice in the ongoing and future work of the Public Utilities Commission.

BROADBAND, UNDERSERVED AND UNSERVED AREAS, DATA MAPPING STUDY. Requests the Hawaii Broadband and Digital Equity Office (Office) to conduct a data mapping study to identify geographically underserved and unserved areas in the State that lack quality broadband connectivity.

Resolves that in conducting its mapping study, the Office is requested to use the broadband definitions of "underserved" and "unserved" in the Infrastructure Investment and Jobs Act 2021, Broadband Equity, Access and Deployment Program.

Requests the Office to make adjustments, while preserving high granularity, in the mapping to best align with the Federal Communications Commission's Broadband Data Collection program that is scheduled to launch this upcoming summer and is driven by the Broadband Deployment Accuracy and Technological Availability Act, which allows for upload by organizations in addition to the cable and telecom carriers and includes broadband fabric data to identify every serviceable location in Hawaii.

Resolves that as a part of the mapping study, the Office is requested to collect data concerning infrastructure deployment and broadband service in the State from internet service providers to develop mapping information.

Requests the Office to, if data are available, give special attention to recording cases and addresses where services have been desired or requested by potential customers but not supplied by the carrier.

Resolves that as a part of the mapping study, the Office is requested to create a map that identifies geographic areas based on the most recent infrastructure deployment and broadband service data collected or other credible sources used by the Office to identify unserved and underserved areas within a county or other appropriate geographic area.

Requests the Office to submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than December 21, 2023.

Requests the Public Utilities Commission, in consultation with the Division of Consumer Advocacy, to consider efforts to mitigate high energy burdens for low- and moderate-income customers and investigate how to integrate considerations of energy equity and justice across its work.

Requests the Public Utilities Commission to examine:

- (1) Low- and moderate-income rate discounts, bill credits, and direct payments and whether these would be appropriate in the State;
- (2) Expanded availability of utility bill assistance programs and whether adequate payment plan arrangements are available to low- and moderate-income customers who are facing economic challenges, such as loss of employment;
- (3) Measures to protect low- and moderate-income households, senior citizens, and households with infants from service disconnections, including reporting requirements for all utilities on the number of customers annually disconnected due to non-payment;
- (4) The advantages and disadvantages of rate design, program offerings, and the requirements of community benefits agreements to address energy burden, energy insecurity, and environmental and energy justice concerns related to energy projects and programs; and
- (5) Other customer-centric solutions to lessen the energy burden on low- and moderate-income customers and determine appropriate benefits above and beyond those accrued to the overall electric grid for communities that serve as geographic hosts to utility scale energy projects.

Requests the Public Utilities Commission to establish the necessary proceeding or proceedings to conduct this examination.

Requests the Public Utilities Commission to consult with the Division of Consumer Advocacy to obtain any necessary input in furtherance of this examination.

AFFORDABLE HOUSING, TASK FORCE. Requests the Hawaii Housing Finance and Development Corporation to convene a task force to:

- (1) Review the permitting process for affordable housing for each applicable state agency and department having jurisdiction over affordable housing development; and
- (2) Conduct a study of the effect of each county's ordinances on housing finance and development on its existing and future inventory of rental and for-sale housing units.

Requests the task force to include one member from each agency and department responsible for the development of affordable housing, including:

- (1) The Executive Director of the Hawaii Housing Finance and Development Corporation, or the Executive Director's designee;
- (2) The Executive Director of the Hawaii Public Housing Authority, or the Executive Director's designee;
- (3) The director of the affordable housing development agency, office, or department of each county, or the director's designee; and
- (4) The Chair of the Hawaii Business Roundtable, or the Chair's designee.

Requests the study to address the following issues:

- (1) The effect of county ordinances on the Hawaii Housing Finance and Development Corporation operations under chapter 201H, Hawaii Revised Statutes;
- (2) Amendments to chapter 201H, Hawaii Revised Statutes, that would allow for increased development of housing where at least sixty percent of the units are priced as affordable; and
- (3) Other topics as necessary to identify county-level barriers to housing finance and development.

Requests the task force to submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2024.

Requests the task force to include in its report to the Legislature recommendations on any options available to streamline the permitting process for affordable housing development.

Resolves that the task force shall dissolve on June 30, 2024.

AFFORDABLE HOUSING, PROJECTS, EXPEDITED PROCESS. Requests the Department of Land and Natural Resources, in consultation with the State Historic Preservation Division and the Island Burial Councils, to create an expedited process to contract its review of proposed state projects, projects on privately-owned historic property, and projects affecting historic properties, to third-party consultants if the projects involve the development of affordable housing.

Resolves that in creating the expedited process, the Department of Land and Natural Resources is requested to consider the following processes:

- (1) Contracting a third-party consultant to conduct the review of proposed affordable housing projects if, after an initial evaluation, the Department of Land and Natural Resources is not able to provide its written concurrence or non-concurrence within sixty days of the filing of a request;
- (2) Receiving pre-approval of the appropriate island burial council before contracting services with a third-party consultant;
- (3) Contracting third-party consultants who meet the educational and experiences standards and qualifications for preservation professionals as determined by State Historic Preservation Division rules; and
- (4) Requiring third-party consultants to provide a recommendation to the Department of Land and Natural Resources within thirty days of the filing of a request with the Department of Land and Natural Resources.

Requests the Department of Land and Natural Resources to submit its findings and recommendations regarding the expedited process, including any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2023.

FERTILITY PRESERVATION PROCEDURES, AUDITOR, MANDATORY COVERAGE, IMPACT STUDY OF. Requests the Auditor to assess, in accordance with sections 23-51 and 23-52, Hawaii Revised Statutes, the social and financial effects of mandating health insurance coverage for fertility preservation procedures for certain persons who have been diagnosed with cancer and whose cancer

or cancer treatment may adversely affect the person's fertility, as provided in House Bill No. 2242 and Senate Bill No. 3308, Regular Session of 2022.

Requests the Auditor to include in the impact assessment report a survey of other states in the United States that have implemented a mandate for cryopreservation benefits for those diagnosed with cancer and to examine what the social and financial impact has been in those states.

Requests the Auditor to research whether the proposed cryopreservation coverage for those diagnosed with cancer constitutes benefits that are in excess of the essential health benefits, thus requiring the State to defray such costs.

Requests the Auditor to research what is being used as the standard medical definition of "reproductive age" that is best suited for the proposed cryopreservation procedures for those diagnosed with cancer and to examine the success rates for the different age groups to determine coverage benefit limitations for this proposed covered benefit, including an examination of whether different standards of infertility treatments are applied to different age groups for those diagnosed with cancer.

Requests the Auditor to research public entities (including but not limited to Medicare and Medicaid) and private entities that provide the proposed coverage for cryopreservation procedures for those diagnosed with cancer and to determine what is currently being used as a standard for coverage, including what, if any, cost limitations are placed on this coverage benefit.

Requests the Auditor to examine current medically necessary standards of care used to determine what types of infertility treatment options are available, at a more cost-effective savings than the proposed cryopreservation procedures, which may be best suited for individuals diagnosed with cancer, and to examine the existing technology in infertility procedures and possible future technology.

Requests the Auditor to examine current scientific studies and current medical literature relating to the efficacy of the proposed cryopreservation procedures for those diagnosed with cancer.

Requests the Auditor to examine whether the scope of coverage for those "diagnosed with a cancer that may, or whose treatment may, adversely affect the fertility of the insured" is limited to medically necessary fertility preservation treatments for "iatrogenic infertility", meaning an impairment of fertility by surgery, radiation, chemotherapy, or other medical treatment affecting reproductive organs or processes.

Requests the Auditor to research the ethical and legal issues surrounding the rights and entitlements with respect to the cryopreserved material, as well as the legal rights of offspring conceived posthumously, including contract remedies (for example, cryobank agreements) to address the storage and disposition of the cryopreserved material, and to consider the following:

- (1) How long will the cryopreserved material be preserved;
- (2) When and how will the cryopreserved material be destroyed;
- (3) Upon a donor's death:
 - (A) Who has ownership rights of the cryopreserved material;
 - (B) Who pays for the storage of the cryopreserved material; and
 - (C) If the donor is married at the time, whether the spouse can use the cryopreserved material to have a baby after the donor's death;
- (4) What will happen to the cryopreserved material if the donor and their spouse separate; and

- (5) Whether others can use cryopreserved material posthumously and who has the legal decision-making authority as to the storage or disposal of the cryopreserved material posthumously.

Requests the Auditor to submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2023.

- (5) Explain the existing pre-kindergarten programs in the State and the efficacy of those programs;
- (6) Examine how a universal pre-kindergarten program in the State may include the following:
 - (A) Appropriate school staffing;
 - (B) Fair teacher compensation;
 - (C) Adequate credentialing requirements; and
 - (D) Staff professional development or continuing education;
- (7) Discuss child assessment requirements, appropriate curriculum, and school schedules for a universal pre-kindergarten program in the State; and
- (8) Provide fiscal analysis and projections, including funding mechanisms that would be relevant to the implementation of a universal pre-kindergarten program in the State.

MADE IN HAWAII AND HAWAII MADE BRANDS, STUDY. Requests the Department of Business, Economic Development, and Tourism to conduct a study on the "Made in Hawaii" and "Hawaii Made" brands.

Resolves that the study:

- (1) Summarize and assess previous work relating to the "Hawaii Made" and "Made in Hawaii" brands to identify significant areas for improvement, increased effectiveness, and flexibility of use;

- (2) Assess and compare the current and potential value of using the "Hawaii Made" and "Made in Hawaii" brands to determine which option provides the most benefits to Hawaii manufacturers; and
- (3) Review best practices that could serve as a model to promote and enforce viable "Hawaii Made" and "Made in Hawaii" brands.

Requests the Department of Business, Economic Development, and Tourism to prepare a plan to encourage and enforce the use of the "Hawaii Made" and "Made in Hawaii" brands.

Resolves that in preparing the plan the Department is requested to:

- (1) Develop a "Hawaii Made" brand look and mark that:
 - (A) Incorporates cultural values;
 - (B) Is sensitive to the concerns of the broader community of stakeholders; and
 - (C) Is marketable, locally, nationally, and internationally;
- (2) Determine proper and effective enforcement procedures and responsibilities, including inspections, investigative and subpoena powers, citations, fines, and injunctive relief, for the "Hawaii Made" brand; and
- (3) Determine incentives, such as tax credits, grants, and promotional support, that would compel Hawaii companies to become certified as companies that produce "Hawaii Made", or "Made in Hawaii" branded products, or both.

Requests the Office to make adjustments, while preserving high granularity, in the mapping to best align with the Federal Communications Commission's Broadband Data Collection program that is scheduled to launch this upcoming summer and is driven by the Broadband Deployment Accuracy and Technological Availability Act of 2020, which allows for upload by organizations in addition to the cable and telecom carriers and includes "broadband Fabric data" to identify every serviceable location in Hawaii.

Resolves that as a part of the study, the Office is requested to collect data concerning infrastructure deployment and broadband service in the State from internet service providers to develop mapping information.

Requests the Office to, if data are available, give special attention to recording cases and addresses where services have been desired or requested by potential customers but not supplied by the carrier.

Resolves that as a part of the study, the Office is requested to create a map that identifies geographic areas based on the most recent infrastructure deployment and broadband service data collected or other credible sources used by the Office to identify "unserved" and "underserved" areas within a county or other appropriate geographic area.

Requests the Department of Business, Economic Development, and Tourism to allocate the sum of \$150,000 for the Office to contract services for data mapping and further telecommunications research.

ELECTRIC VEHICLE CHARGING STATIONS, MULTI-UNIT DWELLINGS. Requests the Hawaii State Energy Office to convene a working group to examine issues and barriers to the installation of electric vehicle charging systems in multi-unit dwellings and make recommendations regarding changes to statutes, rules, or other guidance to help clarify and facilitate the installation of electric vehicle charging systems in multi-unit dwellings.

Requests the working group to examine:

- (1) Barriers to the installation of electric vehicle charging systems at multi-unit dwellings and the underlying issues that give rise to these barriers;
- (2) Whether changes to state statutes, rules, or other guidance could provide solutions and unburden associations tasked with advising owners on technical matters on which they lack expertise;
- (3) Whether guidelines should be established for reasonable technical solutions instead of leaving associations to independently determine installation practices pursuant to section 196-7.5, Hawaii Revised Statutes, relating to the placement of electric vehicle charging stations, and, if so, where those guidelines should be identified in statute;
- (4) A range of technical solutions, including cost recovery and capacity management;
- (5) Management recommendations for multiple owners who wish to install a shared-use charging system as a shared amenity;
- (6) Alternatives to retrofitting multi-unit dwellings that still ensure convenient access to electric vehicle charging systems; and
- (7) Other issues deemed relevant and necessary.

Resolves that the members of the working group include the following:

- (1) A representative from the Hawaii State Energy Office;
- (2) The Director of Commerce and Consumer Affairs, or the Director's designee;
- (3) A representative of the Public Benefits Fee Administrator;

COASTAL ZONE MANAGEMENT PLAN, NATIVE HAWAIIANS, CONSULTATION WITH. Urges the Department Of Business, Economic Development, and Tourism's Office of Planning and Sustainable Development to develop a consultation implementation plan to include consultation with the native Hawaiian community on the types of cultural resources, practices, and knowledge concerning ocean policy in its Coastal Zone Management Plan.

Requests the Office of Planning and Sustainable Development's native Hawaiian consultation implementation plan to include a commitment from the State to support and engage native Hawaiians and give appropriate recognition of their status as the indigenous peoples of the State and an equitable role in ocean planning in the Hawaiian Islands.

Requests the Office of Planning and Sustainable Development to submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2023.

Urges the Office of Planning and Sustainable Development to recommend the following policy statements for adoption:

- (1) The primary objective of consultation is to promote the interests of native Hawaiians in ocean resources, conduct meaningful multi-party information sharing so that an understanding of perspectives is achieved, and give those perspectives meaningful consideration to identify, avoid, and mitigate negative impacts to native Hawaiians;
- (2) The Office of Planning and Sustainable Development is responsible for initiating consultation because proposed actions may affect the marine ecosystems of native Hawaiian communities. Such state actions may affect management decisions; provided that native Hawaiians may also initiate consultation;
- (3) Meaningful discussions involve a two-way exchange of information and perspectives, and the information provided will be considered and incorporated into the design, development, implementation, and revision of state actions. The consultation process should enhance and in no way undermine other types of engagement between the State and native Hawaiians;
- (4) Trust, respect, and ongoing relationships are keys to success in consultation. Meaningful dialogue between native Hawaiians and the Office of Planning and Sustainable Development should be ongoing;
- (5) Consultation should be initiated early at the time when actions are first contemplated, well before decisions are made, and must occur often in the decision-making process;
- (6) The Hawaii State Aha Moku should be a partner and be consulted on traditional practices especially relating to coastal areas; and
- (7) The Office of Planning and Sustainable Development is responsible for communicating if and how the consultation affected agency decision making. If consultation did not affect the decision, the agency should provide an explanation.

SR 207

TELECOMMUNICATIONS, RADIO FREQUENCY EMISSIONS, WIRELESS ANTENNA SITES, STUDY. Requests the University of Hawaii to establish a reliable, independent, and transparent methodology to assess the effects of radio frequency emissions generated by wireless antenna sites.

Resolves that as part of its methodology, the University of Hawaii is requested to establish a process to determine the most appropriate means of providing the public, workers, and others who may be in close proximity to a radio frequency transmitting antenna with information that supports compliance with the Federal Communications Commission's regulations pursuant to title 47 C.F.R. section 1.1307(b), which establishes requirements for applicants seeking authorizations for radiofrequency sources, including compliance with limits on human exposure to radiofrequency.

Requests the University of Hawaii to thoroughly consider and evaluate the following:

- (1) The creation of a central data repository in which the information can be stored and that can be accessed by authorized users, including radio frequency emission information for each transmitting facility;
- (2) That the radio frequency information should include all necessary radio frequency emission characteristics of the facility (e.g., transmitter power, transmit frequency, and antenna type) provided by each Federal Communications Commission licensee to the State of Hawaii or a designated third party, together with any updates, to ensure that the public, workers, or others who may be exposed to radio frequency emission areas that can exceed the Federal Communications Commission's allowable radio frequency exposure limits are not exposed to radio frequency emission limits above the Federal Communications Commission's allowable radio frequency exposure limits;
- (3) That the information should include visual depictions of the radio frequency emissions in relationship to the physical improvements at the facility, such that any or all visual depictions of the radio frequency emissions can be attributed to a particular antenna or sector at the facility with the latest information;
- (4) Methods and mechanisms for exchanging information about facilities and coordinating communications about the facilities, with respect to a particular facility and with respect to multiple facilities, persons who own or control sites where the facilities are located, contractors performing work on the facilities or at such sites, persons who employ individuals performing work on the facilities or at such sites or hire individuals performing work on the facilities or at such sites, and emergency-services agencies or personnel;
- (5) The ability of authorized persons to access and use the latest available radio frequency emission information in any repository;
- (6) The ability to record by whom and the date on which the information was accessed to ensure compliance with any legal requirements;
- (7) A method to annually audit the site-specific safety information to ensure the accuracy of critical safety information;
- (8) A method that provides insurance to parties affected by radio frequency exposure, including Federal Communications Commission licensees, property owners, employers, and state and local governments, for radio frequency-related injury claims at all wireless antenna sites to minimize exposure to an uninsured risk and potential claims and litigation;
- (9) An independent radio frequency compliance third party to administer and provide services with regard to the proper creation, distribution, access, updates, and management of the information requested in paragraphs (1) through (8), and provide any

other additional related services as may be deemed necessary by the University of Hawaii;

- (10) Whether to prequalify a prospective third-party radio frequency compliance administrator and service provider for the performance of the services outlined in paragraph (9) and limit a solicitation to those prequalified administrators and service providers;
- (11) A method to secure funding to be used for the services identified above, including any surcharges imposed upon wireless communications service providers; and
- (12) Whether the amount of regulatory recovery costs being paid per month by consumers to wireless carriers in Hawaii, as outlined in the Federal Communications Commission's Truth in Billing Act, are being effectively and efficiently utilized by those carriers for compliance with site radio frequency safety regulations.

Requests the University of Hawaii to submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than twenty days prior to the convening of the Regular Session of 2023.
